

Testing in iOS

Unit Testing Basics

Test Methods

Test Target

Test Target

1. setUp()
 2. testStuff()
 3. tearDown()
- (repeat for each test)

```
class Tests: XCTestCase
```

```
    testStuff()  
    testThings()  
    notATest()
```

Assertions

```
let result = reticulateSplines()  
XCTAssert(result > 42)
```

checking for a **true** condition

Demo

- ⚙ Add new test target
- ⚙ @testable import
- ⚙ Add an initial test!

Challenge Time!

- ⚙ More tests!
- ⚙ More assertions!
