PROGRAMMING IN SWIFT

PART 1

CORE CONCEPTS

TUPLES

Declare a constant tuple that contains three Int values followed by a Double. Use this to represent a date (month, day, year) followed by an average temperature for that date.

```
39
40    // TODO: Write solution here
41
```

Change the tuple to name the constituent components. Give them names related to the data that they contain: month, day, year and averageTemperature.

```
45
46    // TODO: Write solution here
47
```
